## 2. High-level objectives

- Implement Modify & Delete Event use cases.
- Implement Timeline & Event toString.
- Updated documentation.

## 3. Work Item assignments

The following Work Items will be addressed in this iteration:

Name or key words of description	Reference material	Assigned to (name)	Hours worked
Update documentation.	Make sure all the documents are up to date, for example Detailed design.	Milan	
Implement Modify Event & Delete Event use case.		Basel & Henry	
Implement error boxes if wrong / unfinished information are attempted to be submitted.	When creating a timeline / event there should be an error dialog if you attempt to press create without submitting all the information needed. This goes for all the windows in the application.	Gina & Wael	
CSS and improved styling of the application.		Dimitris	
Implement Timeline & Event to string.		Oskar	
Implement UI Unit tests.		Oskar
