Test Case 1. Create/Add Timeline

Pre-condition: Software fully loaded on your device – ready to touch you inappropriately.

Action	Expected Result	Result after testing
User clicks the add timeline button.	A box 'Add Timeline' pops up, with input options: Title, Description, Start Date, End Date, Picture (not obligatory).	
User fills in the input options.	Software accepts them like a little bitch.	
User clicks on the 'add picture' button.	New window pops up and the user is given the option to choose a picture.	

Timeline Manager project Test Cases

User clicks on the 'create timeline' button.	New timeline is shown on the main window with all the properties that the user submitted. A file for the timeline is created in the software directory with the correct properties.	
--	--	--

Test Case 1.2 Create/Add more than one Timeline

Pre-condition: (1) Software loaded, (2) one or more Timeline(s) created.

Action	Expected Result	Result after testing
User clicks the add timeline button.	A box 'Add Timeline' pops up, with input options: Title, Description, Start Date, End Date, Picture (not obligatory).	
User fills in the input options.		
User clicks on the 'add picture' button.	New window pops up and the user is given the option to choose a picture.	
User clicks on the 'create timeline' button.	The previous Timeline that was shown shows up in the left Timeline List view/bar. New timeline is shown on the main window with all the properties that the user submitted. A file for the timeline is created in the software directory with the correct properties.	

Test Case 2.1. Create/Add Event with duration

Pre-conditions: (1) Software loaded, (2) Timeline created.

Action	Expected Result	Result after testing
--------	-----------------	----------------------

Timeline Manager project Test Cases

User clicks the 'add event' button.	A box 'Add Event' pops up, with input options: Title, Description, Start Date, End Date, Start Time, End Time, Picture (not obligatory).	
User fills in the input options.		
User clicks on the 'add picture' button.	New window pops up and the user is given the option to choose a picture.	
User clicks on the 'create event' button.	New event is shown on the current timeline, with all the properties that the user submitted. The file for the current timeline is modified, this event (its' properties) is added into the file.	

Test Case 2.2. Create/Add Event (without duration)

Pre-conditions: (1) Software loaded, (2) Timeline created.

Action	Expected Result	Result after testing
User clicks the 'add event' button.	A box 'Add Event' pops up, with input options: Title, Description, Start Date, End Date, Start Time, End Time(optional), Picture (optional).	
User fills in the input options.		
User clicks on the 'add picture' button.	New window pops up and the user is given the option to choose a picture.	
User clicks on the 'create event' button.	New event is shown on the current timeline, with all the properties that the user submitted.	

Timeline Manager project Test Cases

	The file for the current timeline is modified, this event (its' properties) is added into the file.	
--	---	--

Test Case 3.1. Modify Timeline

Pre-conditions: (1) Software loaded, (2) Timeline created.

Action	Expected Result	Result after testing
User clicks the 'modify/edit time' button.	A box 'Edit/Modify Timeline' pops up, with input options: Title, Description, Start Date, End Date, Picture (optional).
