Vision Document

1. Introduction

The project is a timeline manager application that allows the user to add timelines and events with details.

2. Positioning

2.1 Problem statement

The problem of	Showing timelines with the related events
Affects	The user
The impact of which is	An easily usable timeline manager application that supports the events with and without duration
A successful solution would be	A nice-looking timeline manager that anyone can use with functions for add/delete timeline and add/modify/delete event

2.2 Product Position Statement

For	User
The (product name)	Timeline manager application
That	- User can add multiple timelines - Scroll the timeline to show the events - Add an event with duration with (Title, descriptive text, and start and end time) - Add an event without duration with (Title and descriptive text) - Modify an event - Delete a timeline - Delete an event
Unlike	Other participating groups
Our product	Feature is simply practice
